Drummore Avenue, Phase 2

The area we purchased next, was also in **Drummore Avenue, Coatbridge**. It was of an irregular shape; however, we were able to make room for another 4x 4 Bedroom Semi-detached homes and 1x 4 Bedroom detached.

As the design in our first phase had proven popular, we retained this design for the second phase – with the addition of a 2nd en-suite in the attic bedroom.

This phase commenced in 2015 and was complete by summer of 2016. Again (as with the first phase) all properties were sold off-plan, prior to completion.

During this phase, we were able to refine our construction management process, which has improved our cost management and reduced waste during the build process.

All these plots were completed with minimal of snagging and on schedule.
